IRMA PIONEER PASSED BEYOND

Ed. T. McDowell, Irma Pioneer,
Passed Away at His Home Here
on Saturday August 30th.

The whole Irma community were shocked to hear of the sudden death on Saturday of one of the old-timers of Irma, Edward Thomas McDowell, born at Unionville, Ontario, 48 years ago. He came to the Irma in 1907, taking a homesteaded N.E. quarter of 30-45-9 the summer of 1908.

When the townsite of Irma was surveyed the fall of 1908, Mr. McDowell was appointed agent for the lots, and went into the implement business along with real estate and insurance which he has kept at ever since.

In 1913 he married Florence McGregor, a sister of the much thought of Dr. M. M. McGregor, who was Irma's first physician.

He is survived by his wife and one child, Helen a graduate of the Irma high school, also a sister and brother residing in Ontario.

The funeral services were held Sunday afternoon at the residence, conducted by the I. O. O. F., who turned out in full after which the remains were shipped to Edmonton for burial.

The Times on behalf of everyone in the district extend sincere sympathy to the bereaved ones.

Wedding Bells

HORNING-LARDER.

The wedding of Mrs. A. M. Larder and Mr. Newton Horning was quietly solemnized at Wainwright Tuesday, September 2nd.

The bride has been assistant post-mistress for a year or more here and also took an active part in all sports with the girls. The groom has charge of the Pool elevator at Claymore where the happy couple intend making their home.

Their many friends wish them every happiness.

NOTICE TO PARENTS.

The Board of Trustees of the Irma School District No. 2435, Irma, Alberta ask that all parents who wish for their children to start school who have attained the age of six years, to kindly hand their children's names to the Secretary on or before Sept. 2nd, as there will be only one beginning class start for 1930-1931 term.

MELGROVE VALLEY GIRL GUIDES HOLD MEETING

The Melgrove Valley Girl Guides held a meeting at the home of Mrs. G. L. Conely. The meeting was held on Saturday, August 23rd. The Sedgewick Girl Guides came up to have a visit with the Melgrove Guides. Everyone had a good time and a lovely lunch was served to all the mothers and to all the Guides at the home of Mrs. Will Conely.

VALLEY SPRING LOCAL HELD INTERESTING MEETING.

Valley Spring Local No. 77 U.F.A., met at the residence of Mr. and Mrs. T. A. O'Neill south of Jarro on Thursday, August 14th. After the usual business being finished Miss Jennie James, delegate to the Institute of Co-operation for Northern Alberta held at Vermilion gave a very interesting report.

This was followed by a joint meeting with the U. F. W. A., about 40 being present when Mr. Andrews, M. L. A. of Sedgewick, gave a very interesting and instructive talk on the Natural Resources and other subjects which were heartily enjoyed by all. Mr. Conely, president replied and a vote of thanks was extended to Mr. Andrews. The ladies supplied refreshments and a social hour was spent.

Next meeting to be held at the residence of Mr. and Mrs. James on Thursday, October 2nd at 8 P.M.

When in Banff, stop at the Homestead Hotel and meet your Alberta friends. Ask to see the last edition of the Irma Times and get the latest news from home.

PARLIAMENT MEETS SEPTEMBER 8TH

Session Will Last For Two Weeks
After Which Bennett Leaves
For London Conference.

Ottawa, Aug. 30.—No attempt at general revision of the customs tariff is anticipated at the emergency session of parliament summoned to meet here a week from Monday.

Insofar, however, as tariff increases are likely to result in an absorption of unemployment, such a policy will probably be resorted to by the Bennett government. It is understood that the principle of such action, already is pretty well decided. In numerous cabinet councils to be held next week, with the prime minister and his colleagues back, the details will be considered.

Then, the session itself will last two weeks anyway if all that is talked of enters into the program, it normally would take much longer but there are abbreviating influences. One is the Imperial conference for which, if he is to be on time, the prime minister and those to accompany him, ought to leave by Sept. 23.

Whatever may be the scope of the tariff proposals, it seems certain that in any revision, textiles will enter. These would probably embrace cottons, woolsens, knitted goods and blankets of which the annual importations are about \$100,000,000. Roughly, 50 per cent. of them come from Great Britain, and the other 50 per cent from the United States and from continental Europe.

The motor car people have been here seeking an increase in their line and those who build farm tractors and all, while something, likewise, is heard from the implement people and many other lines of industry.

Even among those who oppose protection on principle, there is the apparent inclination, now, to invite the Conservatives to go the limit and put to an early test the intrinsic merit of an economic theory to which they are completely committed and for which they have an almost overwhelming mandate.

FRUIT PRICES TO TAKE A JUMP WITH NEW DUTIES.

This week will see increased prices on many of the principal fruits offered on the local retail market, according to advices received. The increase will be the direct outcome of the new higher duties imposed by the federal authorities on fruits and vegetables, such as plums, pears, peaches and tomatoes. All such increases will be borne by the consumers, of course. British Columbia cannot supply the demand for more than a fortnight, after which jobbers will have to turn to the Washington growers and higher prices will prevail on account of the new duties. This news is not very encouraging to the home canners to say the least.

SKY LIGHTS BY NIGHT.

The Aurora Borealis,
The wonders of the north,
Shifting and dancing gaily,
With glancing lights come forth.

Much like a moving picture,
Of dancers, on the stage,
With now and then a fissure,
Again, by lights are swayed.

The Aurora Australis too,
The phenomenon of the South,
Her beautiful sister true
She never hears about.

Oh! Beautiful Aurora lights,
That sweep across the sky,
Do you your stant by night,
As though by day, you're shy.

I when the stars look down,
With bright and twinkling sheen,
Without the least of sound,
Or applause for the beautiful scene.

The moon, with her smiling face,
Greeting both North and South,
All things she sees in space
And knows what its all about.

The word of God came first,
To make all these needed lights.
We thank Him for the Universe,
With the Sky Lights by Night.

—Mrs. G. F. Albrecht.

AIR ARMADA TO DROP INTO EDMONTON SEPT. 17

AERIAL ARMADA AT EDMONTON
ON WEDNESDAY, SEPT. 17TH.

Roaring aeroplanes! Famous pilots!
Thousands of people!

Such will be the scene on Wednesday, September 17th, when fifty aeroplanes racing for the Ford Reliability trophy arrive at Edmonton.

Captain Frank Hawks in his famous "mystery" aeroplane will be there. Last week, he made a record breaking flight from Los Angeles to New York. The other famous fliers will include Forrest O'Brien and Doc Jackson, world record endurance airmen, and George Haldeman, who flew Ruth Elder across the Atlantic.

This is the sixth annual tour, which is looked upon as the major aviation event of the year. In the competition will be planes of various types ranging from tiny open cockpits to giant trimotors. Thus, an opportunity is given thousands to view the latest developments in aviation at close range.

The program at Edmonton will include the arrival of these, eastern machines and an air show which will be staged at the municipal flying field. This is being arranged by the

Edmonton and District Aero Club. Sensational stunts will be seen when the famous airmen put their machines into action. Here the "dare-devils of the air" will flit with danger and prove triumphant.

The arrangements at Edmonton provide for car parking space being reserved, as thousands of cars will come in from many district points. Everything will be done to meet the needs of all visitors.

All manufacturers of aircraft will be represented in this battle for the Edsel B. Ford trophy, which has been won two years in succession by the single engine, twin engines, tri-motors, quadri-motors, one-place, two-place, three-place, and up to 32 passenger capacity; open cockpit, cabins and all the rest of the various combinations that have been assembled in the form of aircraft, will be seen when the big parade zooms into Edmonton on this western tour.

One of the most spectacular and thrilling sights ever seen in western Canada will be found in the arrival of this great aerial armada at Edmonton, where the machines will be arriving every few minutes for an hour and a half.

FARMERS MUST SELL TO POOL

The Wheat Pool Urges Members to
Continue Loyal to their Own
Organization.

The Alberta Wheat Pool, along with the Pools of the two other prairie provinces, is making an appeal to its members to give the organization full hearted support during these times of stress. The Pools are being put through a test which requires all the courage, loyalty and intelligence of pool farmers to withstand. With the co-operation of the members and of every legitimate business interest in the country, there is every reason to believe the darkest hour in the Pools' brief history will be passed by the dawn of renewed prosperity and greater co-operative stabilization.

Many rumors have been circulated that members of the Wheat Pool will seek to evade their contracts this fall but there is no actual evidence that the loyalty of the great mass of the members to their own organization has been impaired to any great extent. Far-thinking people in all walks of life realize that strengthening and developing of the Wheat Pool movement will best serve the industry of agriculture in Western Canada. Nothing can be gained by turning back.

Alberta Wheat Pool directors have announced that all members will be required to live up to their contracts and deliver their wheat to the Pool. There exists no alternative as the contracts are between the members and not as between the head office and the membership. This contract is a solemn obligation and has been proven legally water-tight in the courts, but it is not alone the legality of the contract upon which the Wheat Pool rests its case. It is upon the loyalty and the determination of the responsible and far-seeing wheat growers who are members of this organization.

It is generally realized that the price of wheat is now well below the cost of production. The initial payment is low but the financial stability of the Pool would be imperilled if the amount were fixed at any higher figure. The ultimate welfare of the members makes it necessary that no steps be taken to endanger the safety of their organization.

A farmer purchased a pig from a raiser of fancy hogs. The pig and bill arrived the same day. Next day the dissatisfied farmer wrote to the hog raiser as follows: "Dear Sir: Both pig and bill arrived safely. Judging from their comparative size, you made an error in shipping. You should have sent the bill by express and the pig by mail."

CHURCH NOTICES AND ACTIVITIES

Sabbath Day Finds the Community
Joining in Observance, Prayer,
and Church Attendance.

UNITED CHURCH NOTES.
Services next Sunday will be at Albert, Alma Mater, and town at the usual hours. The pastor will be the preacher.

Rev. John R. Geeson and family returned Friday evening from the School of Religion held in St. Stephen's College, Edmonton. They report having had a very profitable and enjoyable two weeks.

ANGELIC CHURCH SERVICE.
Next service will be held in Irma United church on Sunday, September 7th, at 3 P. M.

Next W. A. meeting will be held at the home of Mrs. S. Miles, northeast of town on Tuesday September 9th. Everybody welcome.

ST THERESA CATHOLIC CHURCH
IRMA, ALBERTA
Service on the first Sunday of each month at 11 a.m.

"One of the big steps in civilization was the horseless carriage," said a lady at a meeting of a literary club in a neighboring town. "And the next step should be a nagless wife," said one of the men to who was a mere spectator.

When attending the show Tuesday evening we heard positively that you can hear from the dead. A man had received a letter from Tofield.

A careful observer rises to remark that Prime Minister Bennett has already solved the unemployment problem. He has engaged 275,000 men to build tariff walls.

"Was this fish cleaned before it was cooked?" asked a travelling man who found a few scales on a piece of fish which he had ordered in a local restaurant. "Of course not," the waiter replied. "What's the use of washing a fish that's lived in the water all of its life?"

"I hear you folks have been roughing it up at Sylvan lake," said one neighbor to another over the back yard fence here the other day. "Well, I'll say we did," was the reply, "why when the wind blew down this high line the other day we couldn't use our electric lights, refrigerator, radio, electric cook stove, toaster, washing machine, or even the vacuum cleaner for nearly two hours."

A careful observer says he has noticed that it is often easy for one woman to run down another and without using an automobile.

REVISED GRAIN ACT EFFECTIVE SEPT. 1st. MIXING CERTAINTY.

NEW HIGH GRADE, NO. 4
NORTHERN, ESTABLISHED
FOR WHEAT.

Canada's new grain act, revised, amended and passed at the last session of parliament, will come into effect Monday, September 1, bringing to farmers and elevator operators a new set of regulations in the marketing processes of the crop.

Mixing of the four top grades of wheat, brought out as a common practice in the investigations of the Saskatchewan grain commission last year, will end this week. Mixing in the high grades is entirely prohibited under the new act. This, together with definition of certain grades of wheat, oats, barley, flax and rye comes as one of the most far-reaching changes.

Statutory grades have been set up for the first five grades of wheat No. 4 Northern comes into the printed form as a new high grade Canadian wheat, the new grade being created to take care of wheat damaged by rust or frost but still otherwise reasonably sound. Canada's five high grades will be defined under the new act as No. 1 hard No. 1 northern, No. 2 northern, No. 3 northern and No. 4 northern.

Three grades of Alberta red winter wheat are defined, six grades of amber Durums, three of White Springs and six grades of mixed wheat. Three grades are provided for Canada Western white seed oats and one for feed oats or screenings. Provision also is made for two grades of Ergoty rye and four grades of Canada Western buckwheat.

Dividing elevators into three classes, public, semi-public and private, mixing rules are laid down for each. Public elevators are not allowed to mix under the act; semi-publics can mix all grades of wheat except the top flour, and can take in all grades from the public; private cannot take in grain that they do not own and can mix all but the top four grades.

Warehouse receipts will be fully registered as to weight and grade by the board of grain commissioners under a clause of the new grain act and several new rules for shipping from country elevators are provided.

The car order book, supplied at railway points where no agent is stationed, may be utilized by farmers of that district, though they may order only one car at a time. Cars, under the new provisions, will be supplied in the order of name on the book.

PROVINCE TO TRY WAINWRIGHT OIL

Wainwright oil will be experimented with by the department of public works in an endeavor to reach a satisfactory method treatment for gravelled highways, to bind, preserve and make smoother the main thoroughfares of the province.

Already experiments have been made with Turner Valley and California oil.

Earlier this week Hon. O. L. McPherson, minister of public works, announced that further experiments would be carried out using extract from the bituminous sands of the Fort McMurray area. Now the Wainwright oil has been added to the list of materials.

WHEN AUTUMN WINDS BLOW CHILL

It is time to consider the condition of your Fall and cold weather garments. It is not too early to send them to us for renovating. Fur trimmed coats should be dry cleaned and moth-proofed at the beginning of the season before any harm has been done. Our repairing and altering departments can also assist you in maintaining your wardrobe at its highest standard. A special department is maintained for our out-of-town patrons.

'Fresh from the gardens'

Getting Back To Nature

Summer vacation days are practically over and boys and girls, youths and maidens are getting back to their school books and studies while father returns to his office or store and mother to her varied household activities. If these vacation days have been sanely and sensibly spent the result is that those who have enjoyed them go back to their studies or work refreshed in mind and body, physically strengthened, more alert mentally, and in every way better fitted for the duties that lie ahead, with stored up energy from the life-giving rays of the sun to carry them through the shorter winter days.

A well spent vacation, however, means more than this, especially for the young. There is no period, no one month or day throughout life when our education is complete, when we are not learning something, absorbing some new and possibly lasting impressions, storing up additional information, gaining in knowledge. Because for a few weeks or months we abandon the school room and text books for a camp in the woods, or a motor trip, or a sojourn in the mountains or by the sea, does not imply that during such time our education comes to a full stop. Quite the reverse is true.

Indeed, living for a few weeks in a summer cottage by one of our lovely western prairie lakes, boating, bathing, fishing, rambling through the woods by day, and the physical pleasures and beautiful days, lazily contemplating the star-spangled sky at night, living the simple life, both in food and dress, one is inclined seriously to question whether in this intense, highly organized, mechanical age, we are not beginning to lose some of the best things in life, and to substitute the artificial for the natural.

For example, are not those responsible for our educational system, the training of our boys and girls for their life work, not missing something very vital and important in their programme of studies? Nowadays we take a boy or girl at the age of six or seven and introduce him and her to the great realm of books. Thus early in life we open up a new world to them, and from that time onward the tendency is for them to turn only to books, or to their teachers using text books, as the source of all information. Boys and girls may thus become great students of books, but they lose the greater pleasures, the romance, the fine inspiration which comes from the study and observation of nature itself and the wonderful works of nature.

The writer confesses that he always liked the ideas and ideals and programme back of the Boy Scouts and Girl Guides movements, the training of youth in the art of close observation, of learning by doing. We like the idea of our Canadian boys and girls obtaining a knowledge of our flowers and trees, our birds and beetles and flies, even our weeds, from nature itself rather than from books; we like them to recognize the evening star, and the dipper, and the north star in the great space of the sky overhead rather than in a diagram in a text book; we prefer they should know how to build a trustworthy footbridge over a stream they may have to cross rather than be forced to go miles out of their way to find a concrete or steel structure; we like to see them capable of starting a camp fire in a few minutes, cooking their own food, setting up a tent, making a bed with boughs, leaves and a blanket or two; we admire a boy using an axe expertly.

Book knowledge should come; it must come; it is absolutely essential. But are we not making the mistake of relying almost wholly on books in our task of education and neglecting the great out-doors and the wonderful works which nature alone presents to us? Is not the early education of our Canadian boys and girls too academic in character, and not quite practical enough?

Nature study in all its many branches is much more interesting to the average boy and girl in their earlier years than is book study, and the lessons they learn from nature will remain with them when much book learning is forgotten. Furthermore, the traits and characteristics developed through close contact with, and study of nature's own methods, are traits and characteristics which create habits of observation and initiative that will be found invaluable in life, irrespective of the profession or business in which one may ultimately engage, and they are real assets which are not so easily found within the covers of books.

Canada is a land of beauty and variety. Nature has been bountiful in her gifts to the Canadian people. It behooves us, therefore, to give our boys and girls every opportunity to observe, study and appreciate these beauties, to live and learn among and from them. Vacation days are happy days, but they are also, in the writer's humble opinion, among the most valuable of all our days of learning. There should be a way found to fit them more closely into our educational system.

Egg Laying Record

The Oyster Holds Undisputed Claim To This Honor

The world's egg-laying record, 25,000 in one season, 115,000,000 in 70 minutes, 680,000,000 in a year—all by a female oyster—is claimed by the oyster.

The feat was reported to a gathering of biologists, of international repute, civic, state and federal health authorities and shellfish commissioners from several states at the convention of the National Association of Shellfish Commissioners and the Oyster Growers and Dealers Association of North America, Inc.

Money For Farmers

Approximately \$1,000,000 is being distributed among farmers of Saskatchewan who were shareholders in the Saskatchewan Co-operative Elevator Company, Limited.

Fitness of nature is the first requisite of real beauty.

Harvesters

You'll find Minard's a certain relief for stiff or strained muscles. Rub it in and the pain disappears.

W. N. U. 1853

Menace To Motoring Public

Outborn Car Is Becoming Peril On Modern Highway

The "One Horse Shay," made famous by Oliver Wendell Holmes, ran its course and then suddenly disappeared into atomic dust. Old cars are not as successfully disposed of, and unless some used-car dealer wins the gratitude of the motoring public by committing them to the junk pile they continue to obstruct traffic on the highway until they collapse in a heap of scrap at the roadside.

There is nothing romantic, uncanny or even interesting about the final chapter of the outborn car. Too often there is tragedy in the concluding lives.

The old, out-of-date, decrepit gas wagon is more than a problem—it's a peril.

It now costs \$25 in Old London to impede traffic by trying to operate an old car that should be on the junk heap. Public opinion will eventually ban such vehicles from our busiest highways, for they are certainly a menace not only to the owners, but to the motoring public as well.

"Did your husband follow my directions? Did he take the medicine I left for him religiously?" "I'm afraid he didn't, doctor. In fact, he swore every time I gave him a dose."

New Zealand is said to be the healthiest country in the world. The average expectation of life in that country for men is about 63 years and for women 65 years.

No Reciprocity

British War Veterans Will Have To Pay \$10 Visa Fee

Eighteen British war veterans, coming to the United States for a convention next month, will be required to pay the usual \$10 visa fee each, despite Great Britain's courtesy a few years ago in admitting several hundred American Legionnaires without charge.

Sir Ronald Lindsay, British ambassador, was informed in a note made public recently that the State Department regretted its inability to comply with his request for a blanket visa, but that the law gave it no alternative. A formal reciprocal agreement would be necessary, the State Department informed Sir Ronald.

Bright Eyes, Rosy Cheeks

The Birthright Of Every Girl

Dull eyes mean misery and weakness—a sure sign of a bloodless condition. Anemic girls and women have dull, heavy eyes with dark lines underneath. The bright-eyed girl or woman is always happy and well.

There is one way to make the eyes bright—to bring the glow of health to pale cheeks—that is to invigorate the body with new blood—rich, red health-giving blood. Dr. Williams' Pink Pills do this and they do it well. Concerning them Mrs. Robert Devitt, Brougham, Ont., says: "My daughter became so ill and nervous we had to take her out of school. She was pale and thin; her eyes were dull and the least exertion upset her. I began giving her Dr. Williams' Pink Pills and in less than six months you would not know her. She gained in weight and strength and is now the picture of health."

Dr. Williams' Pink Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Makes Air Record

Pilot In Northern Alberta Flew 1,500 Miles In One Day, Making Five Stops

The latest of many air records in Northern Alberta was recorded the other day when Captain W. N. Sherlock, of Commercial Airways, flew 1,500 miles one day, making five stops en route for the delivery of letters and packages. The trip was made from Fort McMurray to Alkaid, with stops at Fort Resolution, Fort Simpson, Fort Norman, Fort McPherson and Arctic Red River. Captain Sherlock hails from Cumberland, England, and is a former member of the R.A.F.

Miller's Worm Powders prove their value. They do not cause any violent disturbance in the stomach, any pain or griping, but do their work quietly and painlessly, so that the destruction of the worms is imperceptible. Yet they are thorough, and from the first dose there is improvement in the condition of the sufferer and a cessation of manifestations of internal trouble.

Chain Letters

New Flood Of Chain Letters Cause Trouble To Postal Authorities

London postal authorities are again fighting a new flood of chain letters. The latest of them begins with the names of Charles Lindbergh, Colonel Dawes, Bernard Shaw, John Barrymore, Dorothy Dix and Ramsay MacDonald. By the letter, one is given to understand that all these celebrated people have written nine letters to nine other people. A subtle threat of sudden death to anyone who fails to carry on the chain is hidden in the wording.

Inhale Minard's Liniment For Asthma.

Beautifying Stations

The campaign launched this season by the Canadian National Railways in the beautifying of its station grounds, was a successful move. With a result that a larger appropriation will be considered for this work next year, A. A. Tisdale, general manager, announced.

At one time recently there were 200,000 dogskins at Chinese ports awaiting shipment to other countries.

Automatic telephones have just been installed in Singapore, British Malaya.

A Wonderful Man

Sir Wilfred Grenfell "Father" Of Labrador, Is Well Named

That wonderful man, Sir Wilfred Thomsen Grenfell, K.C.M.G., "father" of Labrador, will shortly be visiting London, when a Mansion House meeting will be held in his honor.

A doctor by profession, he has a passionate love for the sea, and has done much for the benefit of North Sea fishermen.

In 1892 he went to Labrador, where he built five hospitals, seven nursing stations, two orphanages, two large schools, several co-operative stores, in addition to setting on foot much industrial work. In short, he has completely revolutionized Labrador.

Although 65, he still takes an annual cruise in one of his hospital steamers along the Northern Newfoundland and Labrador coasts. His work in Labrador is carried on under four committees, one British, one Canadian, one Newfoundland, and one American.

He is an Oxford man, and played for the university in the Rugby football team. In 1929 he became Lord Rector of St. Andrews University.

Recipes For This Week

(By Betty Barclay)

SMOR RINGER COOKIE

- 1 cupful butter.
 - 1 cupful sugar.
 - Yolk of 1 egg.
 - Almond flavoring.
 - 1 cupful milk.
 - teaspoonful baking powder.
 - Pinch of salt.
 - Flour.
- Cream sugar with the butter; add the beaten egg yolk, milk, salt, and flavoring. Sift baking powder with 1 cupful of flour. Add more flour until a dough is formed that is easily handled. Roll quite thin, cut in strips, then twist and form in circles.

BAKED WINTER SQUASH

Wash the squash. Cut and remove seeds and pulp. Then cut squash in squares and place in a pan containing a little water. Place in a moderate oven and bake until the pulp is soft, basting occasionally with a little hot water and butter. When nearly done sprinkle lightly with brown sugar and dot with butter. Finish baking and serve a square to each person.

Replaced the Breakage

Elderly Woman Is Made Happy By Gift Of Prince

Miss Raymond, an elderly and humble resident of the south of London, has been made happy by a kindly act of the Prince of Wales.

She lives in a hotel in the neighborhood of the cricket ground where the Prince went to attend the England-Australia match.

During an interval in the play the Prince and a party of friends visited the hotel, and one of the old lady's vases accidentally was overthrown and broken.

The next day the Prince sent a colored statuette of himself in hunting costume, accompanied by a letter regretting the breakage, and hoping that she would accept the substitute instead.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother Graves' Worm Expeller, an excellent remedy.

British Columbia Minerals

A report of Hon. W. A. Mackenzie, Minister of Mines in British Columbia, shows an increased quantity production in the aggregate of minerals and metals, though the dollar gross value dropped from \$34,122,722 in the first half of 1929 to \$29,090,487 for the half year of 1930.

Great Barford, where the first inquest held in England was recorded in 1100, has just had its first death inquiry in 1930.

Minard's Liniment for Cuts and Abrasions.

British Rule In India

What England Has Done and Can Do For People Of That Country

"Downeaster" writes as follows in the Canadian Churchman: The achievements of England in India during the last century, I think I may safely say constitute one of the brightest pages in the history of our race and Empire. Like all human records, it is not of course without its blot. But I think it has on the whole fully justified Macaulay's closing words in his celebrated essay on the character and work of Lord Clive, "If in India the yoke of foreign masters, elsewhere the heaviest of all yokes, has been found lighter than that of any native dynasty, if that gang of public robbers that once spread terror through the whole plain of Bengal has been succeeded by a body of functionaries not more highly distinguished by ability and diligence than by integrity, disinterestedness and public spirit, if we see men like Munro, Elphinstone and Metcalfe, after leading victorious armies and deposing kings, return proud of their honorable poverty, the praise is in no small measure due to Clive." But to me, and I believe to the great majority of Britons throughout the Empire, England's noblest achievement in this connection will be the gradual fitting of the inhabitants of the Indian peninsula for self-government and perhaps the event demand it, ultimate independence.

Test Dirigible Possibilities

Series Of Flights Between England And Egypt This Winter

Commercial possibilities of British dirigibles will be tested in a series of flights between England and Egypt this winter, according to Sir John F. A. Higgins, of the British Air Ministry, who was in Ottawa, recently.

The durability of the R-100 was amply demonstrated in its trip to Canada, he said, but data on costs of operating a regular service must be obtained.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Although hippopotami are less than five feet in height, they often reach a weight of over four tons.

Workers of Paris are complaining that their living expenses are mounting.

Her Two Children Had Summer Complaint

Mrs. J. J. MacDonald, Glace Bay, N.S., writes:—"I am the mother of six children, and would not be without a bottle of Dr. Fowler's Extract of Wild Strawberry in the house. My two youngest were very sick with summer complaint, and there was nothing I tried could equal that remedy, and I had tried most everything, but they could get no relief. Dr. Fowler's made a change in both of them in less than two hours."

On the market for the past 85 years; put up only by The T. Millard Co., Ltd., Toronto, Ont.

Foods Stay Fresh Longer This Way

Covered with Paro-Sani Heavy Wax Paper goods that usually stale in a day or so stay fresh for quite a long time. Try it. Get Paro-Sani in the handy, sanitary, knife-edged carton at grocer, druggist or stationer. For less exacting uses get "Centre Pull" Packs in sheet form.

Periodic Health Examinations In The Future To Guard Against Unnecessary Illness

(By John Burke Ingram)

Should doctors be paid for hearing their patients? To this seemingly foolish question a friend of mine replied: "Certainly! That's what doctors are for."

In it?

Do you remember the old, old fable about the way the Chinese pay their physicians? Only when the patient is well is the doctor paid. Thus the interests of patient and doctor are identical. Smart people, those Chinese! Today we are trying to work out some such system in the name of "Preventive Medicine." Today the attitude of the doctor towards disease is changing.

Vaccination against smallpox started that change. Before vaccination, doctors existed solely to cure. With the coming of vaccination they began to prevent illness.

Vaccination has been followed by similar discoveries. It is now possible to "vaccinate" (the word is inexact medically, is correct in general sense) against diphtheria, typhoid fever, scarlet fever, rabies, infantile paralysis and other diseases. Almost every year sees another one or two additions to the list of preventable diseases. And year by year the falling death-rate from tuberculosis proves that preventive medicine is effective in combating many of those ills of the flesh against which no specific has yet been discovered.

The most significant recognition that has been given to the principle of preventive medicine has been the organization of public health departments. The function of every public health official is not to cure disease, but to keep the public healthy. And more and more this is becoming the function of the practicing physician.

What is to happen to the average doctor when—and if—we reach the Aesculapian utopia in which there are no sick people left to heal? This state, thinks Dr. Gordon Bates who writes on the question in the current issue of the Canadian Public Health Journal, will be a most happy one. For instead of having thousands of sick to heal, he will have millions of well folk to keep well!

Truly a more congenial, as well as a more profitable, state of affairs to both doctor and patient.

Half of all the illness in Canada is preventable, he says, "and over 20 per cent. of our deaths are post-ventable." The direct cost of illness he places—from conservative estimates made by public health officials from coast to coast—at \$300,000,000.

He visualizes a day when a mother, instead of philosophically holding their offspring will have their share of children's diseases early and get them over with, will consult her family physician and arrange with him to have the children immunized against these diseases so that they won't have them at all, much less expensive, less annoying, less dangerous procedure. He points out that though Canada has annually about 1,200 deaths from diphtheria, and 13,500 cases of it, preventive medicine could cut the toll of this disease by 95%—and that it falls to do so largely through ignorance or neglect of parents, since diphtheria is principally a disease of childhood.

"But what other phases are there to the adoption of preventive medicine by the general practitioner?" Dr. Bates asks. "One thinks immediately of the periodic health examination idea.

"Many illnesses which have resulted in death might have been prevented had the physician had the opportunity of acting in the incipient stage of the disease in question. An infected tooth or tonsil may spell disease or death; cancer, syphilis, tuberculosis may result in death because of neglect when the symptoms are slight, and these are only examples."

Ample of conditions in which at present the physician too frequently has not the opportunity of exercising a preventive function. Over-eating, over-drinking, overwork, under-exercise, worry may present problems just as serious but the culprit seldom consults his medical adviser until Nemesis is upon him. The effect on sickness and death rates is obvious.

A year ago through the co-operation of the Canadian Medical Association and the Dominion Department of Health a standard form, designed for the use of the physician in the examination of the apparently well, was forwarded to every physician in Canada.

"The case for periodic health examination is so strong that unquestionably this procedure will form a most important part of the armamentarium of the general practitioner of the future to the end that unnecessary illness may be prevented.

"Important steps in the direction of making the application of periodic health examination practical have already been taken. A number of the Canadian life insurance companies have entered into a co-operative scheme with the Canadian Medical Association, whereby certain policyholders will have made available for them, free medical examination by their own family doctors, or at least by doctors of their own choice, the life insurance companies paying the bill."

So the life insurance companies find periodic health examination such good business, as a life-prolonger for heavy policyholders, that they are willing to pay for it!

Which makes it look as though it were a good thing for one to walk around to his family physician and say: "Doctor, look me over now and on every birthday from now on. Practice preventive medicine on me. Keep at my insides with x-rays. Ask me leading questions about my way of living. I don't want to get sick, and I'll pay you handsomely to keep me well!" Clever people, those Chinese!

Value Of Agricultural Fairs

Postmaster-General Relieves They Teach Profitable Lessons

The Minister of Agriculture, Hon. Robert Weir, intends to assume a policy that will render justice to all parts of the country in aiding farmers. Hon. Arthur Sauve, Postmaster-General, said in an address given at the "Three Rivers" exhibition, Mr. Sauve discussed the value of agricultural fairs which taught sane and profitable lessons showing the possibilities of agriculture, which, he said, was the basis of national prosperity.

Reviewing the situation facing the new administration, Mr. Sauve said: "Our problems are many, and it is important that national education should be carried on in such a manner as to assure that all portions of the population contribute to their solution."

"We are experiencing an alarming crisis, which everybody will admit. Everyone must play. The governing bodies must play their part properly."

Clover Seed Prospects

Production Of Alsike Clover Better In Quality Than Last Year

The Seed Branch of the Dominion Department of Agriculture estimates that the production of alsike clover seed for 1930 will be better in quality both with respect to colour and purity than last year's crop. Ontario production is not expected to exceed one-third of the 1929 crop, when 70,000 bushels were harvested. The alsike seed market is not overly promising at the present time. Better prospects are reported for red clover seed with practically no carry-over from last year and 1930 acreage about 50 per cent. below normal. An increased acreage of alfalfa being sown for seed is reported.

Montreal Unemployed

Montreal at present has between 21,000 and 23,000 unemployed, with another 10,000 to 15,000 working but two or three days a week, according to reports from Labor-unions reaching the city hall. It was announced by Ald. Alfred Mathew, member of the executive committee. The information will be passed on to Hon. Gideon Robertson, Minister of Labor, who is compiling data on unemployment throughout the country.

Victoria Tower, London, 420 feet high, is said to be the highest spire in the world.

Causes Of Drought

Scientists Say Storm Track Has Shifted Northward

Increments of meteorological information are but poor compensation, owners of withered crops will insist, for this summer's exceptional drought, yet that information is about the only feature of the weather which can be set down on the profit side of the ledger. The last comparable condition, says the New York Herald-Tribune, seems to have been in 1874, when but few weather observations were maintained and anything like the present world maps of weather was still a dream. This summer for the first time weather scientists have before them in drought time even a partial picture of what is happening to the oceans and air currents and other brewers of storms or droughts. Superficially, the answer to the query "Why the drought?" is straightforward. There has been persistent high air pressure over most of the United States. This has kept out the moisture-laden winds from the oceans on both coasts, for winds tend to blow outward from high pressure areas, never inward toward them.

The true problem, however, is the cause of this persistent high pressure. It is too soon to read this with assurance. The European weather maps, for example, come by mail and are ten days to two weeks late in American laboratories. Yet one fact can be discerned from the maps for this country. What is called the storm track has shifted northward.

Most of the rain in North America is provided by the cyclonic storms which sweep across the continent from the Pacific to the Atlantic every few days in winter and at longer intervals in summer. These storms cause moving areas of low pressure; the low pressure draws in both from the north and the south; these winds enter the cold north winds precipitate the moisture from the warmer southern air. That, in a sentence, is the cause of America's rain.

Ordinarily these recurring storms follow a path which crosses the northern third of the United States. Since July 20 not one of these storms has done so. They have not vanished, inspection of Canadian records show. They merely have been swinging farther north than usual, crossing the Hudson Bay region and providing the more ample rains which Canada has received. The wheat and corn belts of the United States have been left south of the storm track untouched by the mixture of winds which might have brought rain.

A step back of this lies another question. Why has the storm track swung farther north? Here authorities differ, but Herbert Janvry Browne, weather forecaster of unofficial status but of substantial success, has an idea. The ultimate culprit, he believes, is the moon, which in its swings southward and northward in successive decades affects the tidal equilibrium of the oceans and thus the winds on land. The cycle of moon motions which now is occurring repeats, Mr. Browne points out, that of 1874, and 1874 was also a year of drought! As a scientific guess, this is perhaps the best now available. But much research remains to be made before a certain conclusion can be reached.

All He Knew

The patient teacher had explained some of the modern habits in common phrases and talked much of slang and war and radio and what not.

"Herbert," she demanded suddenly, "what are some of the signs of the times?"

"Kept Out, No Fishing, No Hunting, No Trespassing," said Herbert.

Honor Heroic Conductor

Tribute was paid recently by Colonel the Honorable Murray MacLaren, Minister of Pensions and National Health, and Colonel C. A. Hodgetts, Director-General of the St. John's Ambulance Association, to the heroic action of Clarence W. Leach, passenger conductor in the Canadian Pacific Railway between Ottawa and Montreal, who, by his prompt action and presence of mind rescued Claire McDougall from drowning in the Rideau Canal last June. Mr. Leach is shown standing third from the left and alongside him are the Minister, Colonel Hodgetts and J. H. Hughes, C.P.R. superintendent of Ottawa. Presentation of the Honorary Testimonial of the Royal Canadian Humane Society was made in the Minister's office. Mr. Leach is inset.

Beef Grading Policy

Attracting Attention On The British Market, Report Shows

The beef grading policy of the Dominion livestock branch is not only providing a real service to the Canadian consumer, but producer in clearly identifying the true qualities of beef, but is also attracting attention in the British markets, reports show.

The Imperial Food Journal, a recognized authority on market conditions in the Old Country, says: "The introduction of beef grading in Canada, whereby the two top grades are marked for the information and protection of the public, is doing much to strengthen the demand for the better qualities of beef. This should tend to promote the raising of better grades of cattle and the finishing of animals."

Cattle For Old Country

Shipment Made During August Was Just For Experiment

On August 21st, for the first time in over three years, a shipment of Canadian cattle left Canada for the United Kingdom. This shipment of forty head is an experiment that will be watched with interest by western, as by eastern, cattle raisers and shippers. Now that the United States border has been closed to our animals, it becomes all the more desirable to revive the lagged business with the Mother Country. It is proposed that, if shipping facilities can be arranged, sixty thousand head can be sent across the Atlantic this year. This is not the first time that the American Republic, by sudden fiscal departures, has forced us to look to the British family circle as an outlet for our farm products.

Co-Operative Wool Growers

Over 3,250,000 Pounds Of Wool Received At Toronto Warehouse

A recent check-up by the Canadian Co-operative Wool Growers shows that well over 3,250,000 pounds of wool have been received at the Weston warehouse or are en route to that point this season. Another 250,000 pounds are expected; so that the objective of 3,500,000 pounds decided upon at the last annual meeting of the organization, when contract handling was adopted is going to be well exceeded. Alberta furnished over 1,500,000 pounds, while Manitoba, Saskatchewan and Ontario, each contributed about half a million pounds. British Columbia made an unusually good showing with 385,000 pounds, while Quebec and the Maritimes brought along another 150,000 pounds.

In Business For 70 Years

The old village of Bath, near Kingston, Ont., where United Empire Loyalists settled more than 140 years ago, has a resident, Robert Mott, aged 81, who is still active, and has been 70 years in business. He is still conducting a general store, assisted by his wife and son. From 1860 until 1890 he was in the harness-making business. Some of his forebears reached great ages, his grandmother being 101 and his grandfather 90.

Collect Data On Water Fowl

Many hundreds of voluntary observers throughout North America are collecting information concerning the numbers of water fowl observed on specified days each month. Reports for Canada are forwarded to the National Parks of Canada, Department of the Interior, Ottawa, and those for the United States, to the Biological Survey, Washington.

He—"I've just made the last payment on our house."

She—"Good; it's time we bought in a better neighborhood."

Growing Respect and Good Will That Mark Relations Between Canada and the United States

A New Idea

New System Of Marketing Meat Known As The Rapid Freezing Method

Officials of the Dominion Livestock Branch are watching with interest the progress of the new system of marketing meat known as the "package meat" or "rapid freezing" method. It has already been successfully introduced in the larger retail distribution centres in the United States, and bids fair to revolutionize meat retailing methods in the British market. By the new process cuts of beef, mutton, lamb, pork and veal are dressed at the packing plant, packed in individual cellophane wrappers and subjected to rapid freezing at very low temperatures. It is found that by "snap" freezing only tiny ice crystals are formed in the flesh of the meat, preserving all its fine qualities quite unimpaired. The new system provides a serious threat to the future of that old familiar institution, the butcher shop.

(By Annette Worthington)

2546

Soft moulded lines are featured in a printed chiffon of cool green colouring.

It emphasizes the normal waistline through horizontal inverted pin tucks at either side of the bodice.

The bow of plain crepe placed at the left hip echoes the femininity of the mode.

The low flared circular flounce of the skirt terminates in a slender wrapped arrangement at the front.

The caplets falling softly over the arms give impression of sleeves.

Style No. 2546 can be had in sizes 16, 18 years, 36, 38, 40 and 42 inches bust.

Hyacinth blue crepe silk, daffodil yellow sheer linen with soft cocoa brown fallie crepe bow, coral red chiffon, printed dainty in dusty pink tones and peach pink washable flat crepe are essentially smart combinations for summer wardrobe.

Manitoba Egg-Laying Contest

White Leghorns led the Manitoba egg-laying contest at the Brandon Experimental Farm at the end of the 37th week. These birds, owned by J. R. Beer, of Brandon, had a total production record of 1,636.2 eggs and 1,634 eggs. Barred rocks owned by F. E. Foster, of Lena, Man., led for weekly production with 512 points and 46 eggs.

The protracted discussions over naval strength on the part of Great Britain, France, Italy, Japan and this country only serve to emphasize the growing respect and good will that mark the relations between Canada and the United States. Nor does this statement imply any lack of friendly relations in the past. But the growing state which each country has in the other cannot fail to bring them still closer together. Above all, we feel that the people of this country are coming to have a more and more wholesome respect for Canada as it emerges from its pioneering conditions into a great industrial nation. It is not merely her wealth of natural resources which we admire, as anyone must, but the way in which her capable, industrious and enterprising people are developing them.

During the war, Mr. McAdoo, then Secretary of the Treasury, remarked to a high Canadian official that, in his opinion, Canada was the most productive country in the world per capita. Certainly her heritage is rich and vast. It is true that in ten years the United States has invested some \$3,500,000,000 in Canada. But Canada has penetrated the United States as well. One of her life-insurance companies is the largest stockholder in at least two of our great corporations. Her life insurance in force here is held by Canadian companies. Canada is the largest taker of our exports, ranking ahead of any of the Great European powers, with a total value of nearly \$900,000,000, while we, in turn, buy more than \$500,000,000 worth of goods from Canada.

After the war Canada suffered a depression much as we did, and went through several bad crop years. But these were followed by four or five years of big crops and an impressive development in mining, hydro-electric power and the pulp industry. Although Canada has only one-twelfth the population of the United States, she is indeed a powerful neighbor, and one whose bargaining ability is extremely great—far out of proportion to her population. One need mention only her control of the raw materials for paper making. Then, too, the Canadians seem to have very real genius in building up financial organizations; their banks and insurance companies attest to that.

Canada's population is sure to increase. Indeed, we are adding to it constantly. There is migration both ways, an interchanging of population in a great state that can only make for mutual respect and good will. In the case of Canada and the United States, there seems to be a mutual conquest or penetration of one by the other. In this instance, business victories carry peace instead of war or fears of war. Few countries have such opportune associations, and yet one cannot but feel that the extension of these relations is to some extent possible—Saturday Evening Post.

Cultivated Forage Crops

Progress Is Made In Pasture Improvements At Dominion Range Experimental Station

The Forage Crop Division of the Central Experimental Farm had a record year in 1929, as evidenced in the report of G. P. McRostie, Ph.D., Dominion Agrostologist—an illustrated booklet of 46 pages. Amongst other things it is noted that considerable progress has been made on a large number of projects pertaining to range management and pasture improvement at the Dominion Range Experiment Station near Manyberries, Alberta. Much attention has been given, also, to other range areas and to the growing of cultivated forage crops in co-operation with a number of ranchers and farmers throughout the Western Provinces.

About a half-million organic compounds are now known to chemists.

"Thank you for the halibut, uncle."

"Oh, it was a very small gift."

"That is what I said, but mother said I must thank you all the same."

—Buen Humor, Madrid.

A Momentous Time!

The fate of the Wheat Pool now rests entirely with the Pool members.

The Pool will triumph over all obstacles if the membership remains steadfast and unswayed by idle rumor.

The struggle is now at the hardest part, and the loyalty of every Pool member is of urgent importance. The result of the issue lies with the membership.

The safest place for your wheat is in the Wheat Pool, and it should be delivered to Pool elevators.

AN EASTERN OPINION OF WESTERN FARMERS

(Mail and Empire, Toronto)

"To suggest that the farmer of the West is going into wheat bootlegging by wholesale and thus break up the Pool he created, is to suggest that the western farmer is a welsher and a cheat. The western farmer is not going to violate the sanctity of his contract, break his pledged word, destroy his bond—just because somebody with an axe to grind and not sufficient understanding to put an edge on it paints of his 1930 crop future a picture more dark and troubled than the facts warrant."

Deliver Pool Wheat to Pool Elevators

Makes His Last Run

Richard Christopher, for 50 years a mechanic, fireman and locomotive engineer on the Canadian Pacific Railway, opened a throttle for the last time recently when he took his train on the run from London to Windsor, Ontario. He has been selected on various occasions to handle special trains for the Canadian Pacific Railway, including the Prince of Wales, Governors-General of Canada, the Duke of Connaught, and many others. It is his boast that in all these years he has never had a single accident. A touching feature of his last run was the fact that his son, Thomas, although also a locomotive engineer, acted as his father's fireman.

The Wastebasket

Small Dorothy—"Mamma, why hasn't papa any hair?"
Mother—"Because he thinks so much, dear."

Dorothy—"Why have you so much, mamma?"
Mother—"Go away and do your lessons!"

Sandy McGregor's small baby swallowed a penny and Sandy rushed the child to the doctor. The doctor took off the baby's clothes, examined it thoroughly, punching its stomach, and then asked Sandy: "How old is it?"
"1879," Sandy replied.

People at Sedgewick complain that some fellow is sneaking around peeping in windows at night. Probably looking for a wife and is doing a little window shopping.

"Why do you use green lipstick?" asked a Wainwright girl of her girl friend. "My boy friend is a railroad man," she replied.

"I never saw any pictures of angels with whiskers; do men go to heaven?" asked a little girl of her teacher in the Sunday school class here. "Yes," the teacher replied, "but you see they get there by a close shave."

An editor in the southern part of the province decided to take his vacation a little ahead of time this year, and on his return he will probably travel down a back alley. In a recent week-end of the stylish walking of a young couple in his town, and among other things, that "the bride wore a large hat and shoes to match."

Si Brown stood on the corner of the main street in the busy city and gazed with amazement at the stream of vehicles moving past. Finally he turned to his companion and said in an awed voice: "Jee-rusalem, Hiram, they sure are behind in their hauln' ain't they?"

It was a Kansas editor who left town for keeps, when his machine printer left out two capital letters in a social note and it read: "James Talley, popular business man, and Miss Sarah Sorrenson, a long hollow school teacher, were visiting friends in this city today."

Here are a few of the difficulties of the English language: A flock of ships is called a fleet; a fleet of sheep is called a flock; a flock of girls is called a bevy; a bevy of wolves is called a pack; a pack of thieves is called a gang; a gang of angels is called a host; a host of porpoises is called a shoal; a shoal of buffaloes is called a herd; a herd of children is called a troop; a troop of partridges is called a covey; a covey of beauties is called a galaxy; a galaxy of ruffians is called a horde; a horde of rubbish is called a heap; a heap of oxen is called a drove; a drove of blackguards is called a mob; a mob of whales is called a school; a school of worshippers is called a congregation.

Rover is Dead

Bill had spent one year in college and had realized that it took a lot more money for a young man to live than his dad realized. When he arrived back home on the farm he determined to get more for the next year. When his father asked him about college and his professors, he said: "Father, you have no idea what a wonderful place a college is; and the professors, say they are so smart that they can even teach animals to talk." "You don't say!" exclaimed the old farmer. "Well, I will certainly have to send Rover back with you next fall. He is the dumbest dog that ever lived and if they can teach him to talk I'll endow the college."

In the fall, Bill returned to college, taking over with him and also \$100 for his tuition. During the year he wrote how Rover was not only learning to talk but was taking music lessons and many other things as well. At the end of the term, Bill had Rover chloroformed and then returned home.

The old farmer met the train, all excited, wishing to hear Rover talk. "Where is Rover?" he cried. "Father, I hate to tell you," Bill replied, with a sorrowful countenance. "We had to kill Rover."

"Kill him!" shouted the farmer, after I spent \$400 to educate him. What did you kill him for?" "Well father, we had to kill him because he talked too much. Do you remember the time you stole the cow from farmer Brown's pasture and sold it to the butcher? Well he told that. And do you remember the time you took several loads of wheat out of Robinson's granary? Well, Rover told that. And do you remember the time Mother was away and you . . . " "Stop! stop, son," cried the old man. "Are you sure that dog is dead?"

RECIPES IN WHICH HONEY IS USED TO ADVANTAGE.

SUGGESTIONS FOR THE USE OF HONEY IN THE HOME

The following recipes have all been tested. Please note that all measures are level, and that flour should be sifted once before measuring.

ORANGE AND NUT BREAD

1 egg yolk, 1 cup milk, 2 cups flour, 1-2 cup chopped walnuts; 4 tpsns baking powder, Rind of 3 oranges, 1 cup honey, Salty water, 1-4 cup water.

Cut the rinds of oranges in small slices. Boil in salt water until soft (about 1-2 hour), drain well and boil very slowly in 1 cup of honey and 1-4 cup water until very thick. Beat egg yolk thoroughly. Add milk flour sifted with dry ingredients. Then add orange strips and honey mixture while still warm. Add chopped nuts. Place in well greased loaf tin and bake slowly one hour. Should make two loaves.

Steamed Brown Bread

2 cups Graham flour, 1 cup corn meal, 2-3 cup honey, 2 cups sour milk, 1 tpsn salt, 1-2 tpsn soda, 1 tpsn boiling water, 1 cup raisins.

Mix together the corn meal, flour and salt. Add the sour milk and honey and soda dissolved in boiling water, let the raisins. Steam 3 hours in a well buttered covered pan. Do not have more than 2-3 full to begin with. Serve with honey baked beans.

Afternoon Tea Suggestions That Are Different

Honey Cinnamon Toast—Butter toasted bread, spread with honey and sprinkle with cinnamon. Reheat sufficiently to blend cinnamon and honey. Serve hot.

Orange Nut Bread Toast—Place thin slices of bread on a pan in the oven and toast both sides. Butter and spread with orange marmalade. Cut in triangles and serve hot.

Honey Cheese Wafers—Toast saltines until crisp. Spread with the following mixture: One tablespoon cream cheese, 2 tpsns chopped nuts, 1 tpsn honey. Mix cheese and honey and add nuts.

SANDWICHES

Orange Nut Bread and Cream Cheese—Use the bread at least three days old. Cut thin, spread one slice with butter, the other with honey cheese and nut mixture used on the wafers given above.

Honey Date and Nut Sandwiches—1-2 cup chopped dates, 1-2 cup warm honey, 1-2 cup chopped walnuts. Mix well and spread on Graham bread.

Honey and Cheese—Mix honey and cream cheese until a smooth paste is formed. Vary by adding chopped nuts or pimento or olives.

CAKES AND COOKIES

Honey Almond Rolls

2 cups cake flour, 1 cup butter, 1 cup finely chopped almonds, 1 cup honey, 4 egg yolks, 1-3 tpsn salt.

Cream together butter and honey. Add beaten yolks, flour and almonds. Mix thoroughly. Shape the dough into rolls about 3 inches long and as thick as a finger. Bake in a hot oven 15 min.

Ginger Snaps

6 tpsns honey, 6 tpsns shortening, 1-2 cups flour, 1-4 tpsn soda, 1-2 tpsn ginger, 1-4 tpsn salt.

Heat the honey and shortening to boiling point. Cool and add the dry ingredients which have been sifted together. Chill and roll out very thin. Cut, place on buttered sheet, and bake 6 to 8 minutes in a hot oven.

Honey Oatmeal Drop Cookies

3 cups flour, 3 cups oatmeal, 1 cup seedless raisins, 1 cup honey, 1-2 cup sugar, 1 tpsn vanilla, 1-4 cup sweet milk; 1-4 tpsn soda, 1-4 tpsn salt, 2 tpsns baking powder, 1 cup nuts, 1-2 cup shortening.

Cream butter, honey and sugar together. Sift flour measure and sift with dry ingredients. Add alternately with the milk. Add oatmeal and nuts mixed, chopped raisins and vanilla. Drop with a spoon on a well greased baking pan and bake 20 minutes in a hot oven.

Honey Date Strips

3 eggs well beaten, 1 cup honey, 1-1-3 cup flour, 1 tpsn baking powder, 1 tpsn vanilla, 1 cup chopped nuts, 1 lb. chopped dates.

Mix together the honey and well beaten eggs. Add the flour and baking powder sifted together, the nuts and nuts. Bake in a long flat tin. Mixture should not be more than 1-4 in. high. When baked it will be about 1-2 inch high. Cut in strips 1-2 inch wide and 3 inches long. Pack in a crock and roll in powdered sugar before serving.

BAKING POWDER BISCUITS AND VARIATIONS

2 cups flour; 1 cup milk; 2 tablespoons butter; 2 tablespoons lard; 2 tpsns honey; 4 tpsns baking powder; 1 tpsn salt.

Sift flour. Measure and add dry ingredients. Sift together four times and gently rub in shortening. Mix honey with half the milk and add. The balance of the milk to be added carefully. (May not require quite all of it.)

Toss on a floured board. Pat out with fingers, cut in desired shape and bake in a hot oven. Serve hot with comb honey.

Any of the following mixtures may be spread on the dough after it is rolled out and bake as above.

1. Honey Cheese Biscuits—1-2 cup Canadian cheese mashed, then creamed with 1-4 cup whip cream, 2 tablespoons honey and 1-4 cup rolled walnut meats.

2. Honey Raisin Biscuits—1-4 cup raisins, 1-4 cup butter and 1-4 cup honey.

3. Honey Orange Nut Biscuits—1-2 cup honey, 1-4 cup honeyed orange strips (as prepared for orange nut bread), 1-4 cup butter.

MUFFINS AND VARIATIONS

Regulation batter:

1 egg beaten very light; 2 tpsns shortening; 2 tpsns honey; 2 tpsns baking powder; 1 tpsn salt; 2 cups milk; 2 cups white flour.

Mix shortening and honey with beaten egg. Add milk and sifted dry ingredients alternately. Beat until mixture is smooth and creamy. Pour in well buttered muffin tins and bake in a hot oven thirty minutes. Serve it with honey. Makes 24 muffins.

Variations

1. Honey Cheese Muffins—1 tpsn grated cheese to each muffin.

2. Honey Fig Muffins—Drop 1-2 fig cut in small pieces in batter of each muffin tin.

3. Honey Date Muffin—Drop a date cut in small pieces in batter of each muffin tin.

4. Honey Nut Muffins—Sprinkle batter with chopped walnuts or almonds before baking.

5. Honey Orange Nut Muffins—Use regulation honey muffin batter. Add 1-2 cup honeyed orange rind (as prepared for orange nut bread), and 1-2 cup chopped walnuts. Pour in well buttered muffin tin and bake 30 min.

Honey Bran and Nut Muffins—

1-4 cup honey; 1 tpsn melted shortening; 1-2 cup Graham or whole wheat flour; 1-2 tpsn baking powder; 1-2 cup chopped nut meats; 3-4 cup soured milk; 1-2 tpsn soda; 1-4 tpsn salt; 1 egg; 1 cup all bran.

Mix melted shortening and honey. Add to beaten eggs. Mix all dry ingredients for bran and nuts. Sift twice, then add the bran and nuts. Alternately add sour milk and flour mixture. Bake in well greased muffin tins in hot oven. Nuts maybe omitted.

Cakes and Cookies.

Fruit Cake—2 1/2 cups butter, 1 cup of honey, 4 eggs, 2 1/2 tpsn soda, 3 1/4 cups flour, 1 1/4 lb. almonds, 1 lb. raisins, 1 1/2 lb. citron peel, 1 teaspoon cinnamon, 1 teaspoon mace. Follow the usual method for mixing a cake. Bake in a very moderate oven 1 1/2 hours.

Spice Cake—1 egg, 1 cup of honey, 1 1/4 cup hot water, 1 1/2 cup flour, pinch of salt, 6 tablespoons melted shortening, 1 teaspoon soda, 1 teaspoon cream of tartar, 1/2 teaspoon cinnamon, 1/4 teaspoon nutmeg.

Beat the egg, add honey and water. Sift together the dry ingredients and add to first mixture. Beat slightly; add the melted shortening. Bake 45 minutes in a moderate oven.

It's better to subscribe for your home paper and not try to borrow it. A farmer who didn't take the home paper sent his son over to the neighbor's last week to borrow it. On the way the lad knocked over a stand of bees in the yard. His father, hurrying to help him, ran into a barbed wire fence, gashing his leg and ruining a new pair of overalls. Hearing the noise his wife ran out, upsetting a four-gallon churn of cream into a basket of kittens, drowning the litter. At the same time she dropped and broke a new set of store teeth. During the excitement the oldest daughter eloped with the hired man, the dog broke up eleven sitting hens and the calves got out and entirely chewed up a line of washing hung out to dry.

KINSELLA NEWS

Miss Alice Murray left on Saturday evening for Edmonton where she will attend school this year.

Mrs. Haukeworth and son of Vermilion spent Sunday with the former's daughter Mrs. J. Neale.

Mr. and Mrs. P. J. Wangness and daughter and Mr. and Mrs. Lund spent Sunday at Viking.

Hogan Lund who has been working here most of the summer for Messrs. Wangness and Smogard returned to his home in Viking on Saturday evening.

Miss Kathleen Ferries left on Monday evening for Edmonton where she will attend the University this fall.

The Ladies Aid will meet at the home of Mrs. James Murray on Thursday, September 11th, at 3 P. M. This will be a missionary meeting.

Mr. B. Wachter foreman of one of the B. & B. outfits of the C. N. R. and his son spent the holiday at their home here.

Miss Madden left on Monday evening for Saskatoon where she will attend school.

Mr. Watson who has been the station agent here during the absence of Mr. Wadden while on his holiday left for his home in Edmonton on Saturday.

The first real frost of the season visited this vicinity on Saturday evening and one somewhat more severe on Sunday night.

Mrs. J. Ansell entertained her sister-in-law Mrs. F. Ansell and daughter of Killam last Wednesday afternoon.

Mr. Jack Stronach who has been teaching at Rocky Mountain House, spent Sunday with his parents here. He returned on Monday to Rocky Mountain House to begin his duties again on Tuesday.

Miss Isabel Stronach returned on Monday to her school near Minburn. Fred Loades of Viking has accepted a position in the Kinsella Service Garage.

JARROW NEWS

Miss Marion Matthews is leaving this week for Edson where she will stay for a couple of months.

School opened here on Tuesday September 2nd with a good attendance. Mr. McNab has charge of the senior room and Miss Doherty of the Junior room.

The heavy frosts on Saturday and Sunday nights have played havoc with the gardens in this district. Most of the grain is too far advanced to be hurt much.

Mrs. J. Miller is visiting with relatives at Hay Lakes.

Mrs. J. R. McColman of Vancouver is visiting with her sister Mrs. Lux-

ton this week.

Miss Aubyn Marbury left on Wednesday for Killam where she will stay for some time.

Mr. and Mrs. H. McDougall, accompanied by Mr. and Mrs. Bruce McDougall of Loughheed, spent Sunday at their parents home in Greenshield.

The Ladies Aid held their regular meeting on Wednesday afternoon at the home of Mrs. A. Christenson. A good number was present and a pleasant afternoon spent. The hostess served a dainty lunch at the close of the meeting.

VIKING NEWS

The anniversary dance of the opening of the Elks hall held on Thursday evening last fell short of the attendance at the opening a year ago. However those in attendance enjoyed the event, and the music supplied by the Serenaders under the direction of Mr. Clinton, was all to the good. Later on after the harvest the Elks intend to stage another ball when it is hoped that more people will come out and enjoy the large commodious dance floor provided for such occasions.

Through the efforts of the local humane society, a water supply has been obtained at the Viking stock yards. The matter was taken up some time ago with the officials of the Canadian National railways, and when the need was pointed out to them, they had a well drilled on the premises. It should be a matter of great satisfaction to stock men to know that their stock can be watered before being shipped from this point.

The Bert Johnston Show Company have been appearing at the Elks hall this week, and are holding the final performance tonight (Wednesday). Mr. Johnston has a bag full of tricks and magic stunts that keeps the crowd wondering what is coming next. Mr. Johnston has a fine personality and together with a rapid fire talk that keeps the audience in a good humor, presents a program that pleases young and old. His marvelous escapes from boxes and steel cages while handcuffed and roped is startling to say the least.

The Viking public and high schools opened on Tuesday morning with a large attendance of pupils anxious to get back to their studies after enjoying a two months' vacation.

The teaching staff consists of H. B. Rodgers, principal; Allan A. Mc-

ris, vice principal; Miss Mary Hoskins, grades 6 and 7; Miss Anna Harris, grades 4 and 5; Mrs. S. Clark, primary.

The school has undergone a thorough cleaning and was in the best of shape when the pupils and teachers entered the portals of learning on Tuesday forenoon.

The school board consists of C. G. Purvis, Mrs. W. H. Collier, C. O. Wollen, with W. McAtthey as secretary treasurer.

Miss Fiona Milne, daughter of Mr. and Mrs. J. Milne, northeast of town, left on Monday to teach at Badger School near Kinsella. Miss Milne is a recent graduate of the Camrose Normal.

Ed. Kirsch, a former resident of this district, arrived from Auburn, Washington, on Monday, to renew acquaintances and attend to business matters.

Another aspirant to the title of potato king of this district is Harry Cartwright who brought in a tuber to this office that weighed one pound and five ounces.

Word received from Mr. and Mrs. Green who are on a tour to visit relatives and friends in Ohio, state they are having a most enjoyable holiday.

Miss Kathleen Harold, of Nanayo, north of Edmonton, has been visiting with her friend Miss Florence Gares, at the H. E. Gares home north of town.

Rev. and Mrs. Bainbridge, and children, who have spent the past two weeks with friends and relatives in Edmonton, returned on Tuesday afternoon.

Dr. Little returned on Saturday evening from Winnipeg where he had attended the annual convention of the Canadian medical association.

GOVERNMENT GRAIN SAMPLING SYSTEM

(The following describes the thoroughness of the system of sampling as carried on by the Government Inspection Dept.)

Upon arrival of a trainload of grain at an inspection point a Government yard clerk lists the cars from the way bills which follow each car, listing car numbers, kind of grain, point of origin, destination, name of shipper and consignee. These details are necessary for the issuing of Inspection Certificates. Sampling crews with Foremen then proceed to the train. The car opener breaks the seals and a record is taken of them. With a pinch bar the door is pushed open. A sampler then mounts a ladder, levels the grain just inside the door and spreads out a sheet of canvas two and one half by six feet. Then comes the extremely heavy work of pushing the brass probe to the bottom of the car in a number of places. This probe is 72 inches long and has an outer sheath which, when it's handle is turned, opens or closes its eleven compartments. The probe is emptied in rows on the canvas and is examined by the sampler to see if the sample is uniform in quality.

In case the grain in one part of the car proves to be poorer than the rest of the car, three samples are taken instead of only one; one being the inferior grain; another of the better grain and another of the average of the whole car.

The sampler writes the car number on a cardboard ticket, date, load lines showing depth of grain, and initial's ticket, thus making a complete record of the sampling of each car; the grain and the cardboard ticket are put into a four-pound canvas bag and the string is drawn tight. The car door is closed and a new seal attached.

Cars are also examined as to their condition; a careful examination being made for signs of leaks and a record is made of the seals and the condition of each car, also leaks, if any. This work is done by separate crews of the Government Weighing Department.

When the entire grain has been sampled, the samples are collected and are brought into the Government grain yard office, where the car numbers and the kind of grain are checked from the train list to detect any possible errors. Inspection sheets are also written up in the yard office from the train lists. After the samples have been checked the strings are drawn tight and the samples are put into boxes holding two dozen samples, and inspection sheets are despatched by truck to the Central Inspection Office for grading.

In many cases, it is impossible to get a good sample on account of cars being loaded too full. A good sample means seven good probes (e.g. from the bottom of the car), as follows: One in each corner, and three down the car lengthwise. When less than seven good probes have been taken only a provisional inspection is made, final inspection to be made at unloading, and in some cases, cars are loaded so full that it is impossible to get more than one good probe, and sometimes none. Cars like these will not be inspected until at unloading.

Trains arrive at all hours, day and night. During the fall rush trains of grain leave the Winnipeg yards every twenty minutes bound for the Head of the Lakes, and for a long period during the fall rush of 1928 upwards of three cars were sampled in the Winnipeg yards over twenty four hours.

The samplers and foremen are in line for promotion to Deputy Grain Inspectors, providing they are able to pass a very stiff practical examination set by the Chief Inspector and the Civil Service Commission.

The sampling is carefully done and the system is recognized as being most thorough; wherever possible there is a double check on the work.

It pays to read advertising messages in this paper, week by week; they contain store news, and information of much value—offerings of bargain buys which mean money saved to the careful shopper! Incidentally, it is mighty poor economy to be without the local paper—its advertising news alone will, in the course of a year, more than repay in dollars and cents the price of the annual subscription.

4 Years without HEADACHE

How do you deal with headaches? Do you take something to deaden the pain without getting rid of the trouble which causes it? Thousands do, despite the medical profession's warning of "DON'T!" Such makeshift methods simply suppress the symptoms of headaches. They merely numb the nerves and leave the underlying cause to look after itself. And it only obtains a flimsy grip. Headaches can generally be traced to a disordered stomach and to the unassisted retention in the system of stagnating waste material which poisons the blood. Remove these poisons—prevent them forming again—and you'll never have to worry any more. And that is just how Kruschen Salts bring swift and lasting relief from headaches. Kruschen Salts aid Nature to clear your body completely of all clogging waste matter.

For many years I suffered from severe headaches almost daily. I started taking the small dose (of Kruschen) a matter of four years ago. I can honestly say I have never had a headache since. (Mrs. M. W.)

WORLD HAPPENINGS BRIEFLY TOLD

A new "dress" is being prepared for the dirigible, R-100, which made an epic flight recently to Canada. Hundreds of thousands of feet of old fabric which has been in service for the last three years will be scrapped.

Aroused by a spirited campaign of personalities, the greatest number of Texas voters ever to visit the polls denied Mrs. Miriam A. "Ma" Ferguson another opportunity to serve the state as governor.

The gross earnings of the Canadian National Railways, for the week ending August 21, 1930, were \$4,348,000, as compared with \$5,213,754 for the corresponding period of 1929, a decrease of \$865,154.

Mrs. N. G. Peters, of Denver, Colo., would make a good instructor in a memory school. When a thief stole 21 phonograph records from her home she was able to give the song 'title on each disc, a total of 42.

Exports of Canadian wheat during July amounted to 19,858,298 bushels. It is shown in a report issued by the Dominion Bureau of Statistics. This was an increase of 2,849,283 bushels over the figure for July, 1929.

The Brooklyn, N.Y., Bureau of Charities, has been experimenting with the handling of mail by blind women for some time. Fifteen of them, engaged in letter-shop activity, have handled 217,371 pieces of mail, since last November. The shop is under the direction of two supervisors and a solicitor-manager.

Adoption by the government of the recommendations made by the employment service council of Canada which met in Ottawa, "would undoubtedly do much to improve the situation and lessen the volume of unemployment." Tom Spence, president of the Trades and Labor Congress of Canada, declares.

Interesting Expedition

British Scientist To Explore Old Hunting Ground In Turkestan

Sir Aurel Stein left Simla, recently, on what may prove to be as wonderful an expedition as any of those which this savant has already to his credit. His ultimate objective is his old hunting ground, the Lop Desert, in Chinese Turkestan, south-east of the Tien Shan range, out on route he has mapped out a fascinating programme. The expedition has been made possible by the generosity of Harvard University, which has contributed £20,000, and the British Museum, which is contributing £2,000 annually for three years.

Run On Immigrants

Permits to bring in relatives from Central Europe will no longer be available to former inhabitants of that region who are now settled here, according to the interpretation given by those interested in Toronto to a circular sent to officials by the Dominion minister of immigration. The circular announces the striking out of the clause of the order-in-council under which permits have been secured since the war.

NO MORE STOMACH TROUBLE
FRUIT-A-TIVES ENDORS'D
"No more stomach trouble. Can eat anything," writes Mrs. E. White. Thousands say indigestion, heartburn, gas, sour stomach, "fruit-a-tives." Constipation, sick headaches and overeating. Nervous, heart, sleep, rheumatism, pipe, etc. Constipation cures quick. Get "Fruit-a-tives" from drugist today.

W. N. U. 1853

To Curtail Dumping Of Soviet Coal

Matter Will Shortly Receive Consideration Of The Government

Steps to curtail the dumping of Soviet Russia coal in Canada will, it is understood, shortly receive the consideration of the government. This coal, the alleged product to a considerable extent of convict labor, has been advertised for sale in Canada at the low rate of \$5.50 per ton; and increasing quantities have been coming into the Dominion since 1928. Early action, as a means of reducing unemployment in the coal areas of Canada, is probable.

The course of the government would be in keeping with its proposal for a national fuel policy. Formulation of this policy will likely be based to a degree on a scientific research into certain phases of the problem.

Close to \$1,125,000 in value of Russian coal was imported into Canada for the year ending July 31 last. Total imports for the year reached 305,270 tons.

For the four months ending in July alone, 104,781 tons were imported at a value of \$663,353. In June imports of this commodity reached 63,698 tons, and in July the amount was 27,388 tons. April and May showed imports of 6,200 and 7,525 tons respectively. The four months period reviewed for 1930 show an increase of 90,546 tons as compared with April, May, June and July of 1929.

Official records show that by far the great bulk of these shipments enter Canada via Montreal, with lesser cargoes passing through the ports of Saint John and Halifax. A comparatively small tonnage passes through the ports of Quebec and Sorel.

Protests against the entry of Soviet Russia coal were registered repeatedly in the House of Commons last session. The basis of these complaints was that the importation of the product deprived Canadian miners of employment especially during the off-seasons. In the recent general election campaign also the increasing quantities of this commodity arriving from Russia came under considerable criticism.

Winnipeg Newspaper Union

(By Annabelle Worthington)

(By Annabelle Worthington).

This is really a little dream of a frock for kiddies of 2, 4 and 6 years. It affects piquant cape sleeves. It has plaits from shoulder to hem at either side of the front and the back to provide ample fullness to the skirt. It has scallops too—at the neckline, to finish sleeves and scallops at the hem. It is pale blue dotted dimity so smartly practical for warm days for play or for "teat." Style No. 2562, a one-piece affair will be found extremely easy to make. It is quite as smart in gingham check, polka-dotted cotton, broadcloth, plique prints and linen. It's adorable in organdie, tub silk or handkerchief linen. Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

Vaccine For Leprosy

Japanese Doctor Cultivates Bacillus Which May Form Protection For Dread Disease

Dr. Kiyoshi Shiga, director of the government hospital at Seoul, Korea, announced recently that he had succeeded in artificially cultivating the bacillus of leprosy. The discovery is regarded as of the greatest importance for the future development of methods for preventing as well as for treating leprosy.

The cultivation of the leprosy bacillus is the result of two years of experimentation on the part of Dr. Shiga. He has recently been able to inject the bacillus into moles, with the result that within two months the moles developed symptoms of leprosy. His experiments with mice failed at first, but later experiments with mice deficient in certain vitamins were entirely successful.

"Although my experiments are not completed," Dr. Shiga said in an interview, "I have no doubt that within the near future, as we are able to experiment with other animals, we shall be able to develop means of protection against leprosy by vaccination, as well as to discover suitable means of treatment."

As a young man Dr. Shiga studied in Germany and was later sent on government work to India, Italy and England. He was Professor of Bacteriology at Keio University until his appointment as head of the government hospital at Seoul, in 1920.

This is not the first time the bacillus of leprosy has been artificially cultivated, according to Dr. Victor G. Heiser, of the Rockefeller Foundation. It was cultivated by Dr. Moses Clegg, at the leper colony in the Philippines. Last year it was again cultivated artificially by Dr. E. Walker, of the Hooper Institute of San Francisco. About ten years ago a Russian scientist, working in India, succeeded in growing it artificially.

"However," added Dr. Heiser, himself an authority on leprosy, "Dr. Shiga, who is an eminent Japanese professor, believes that he has discovered a more positive method of artificial cultivation, one more certain to produce the desired results. The previous methods have not been accepted by scientists as reliable. The artificial growth of a bacillus opens the way to the possibility of developing a vaccine for the prevention and treatment of that particular disease. But it is only a hope."

The leprosy germ was originally discovered in 1871 by Dr. G. A. Armauer Hansen, a Norwegian scientist.

It was reported from Vienna, in April, that Dr. Hermann Doerfl had succeeded in isolating the leprosy bacillus and had produced a serum that was giving excellent results.

Will Ship Seed Potatoes

British Columbia Receives Experimental Order From Argentine

British Columbia potato growers will open a new market for their product in the Argentine immediately. They have received an experimental order for 300 tons of certified seed potatoes for Argentine growers and will ship them immediately, with government assistance to finance the transaction.

It is believed the Argentine will offer a large and increasing market for potatoes grown here for seed purposes.

Ask Jews To Return

Arab Residents Of Hebron Hold Out Olive Branch

Holding out the olive branch to the Jews, a number of Arab residents of Hebron, which was deserted by the Jews since the riots last August, have petitioned for the return of Dr. Daniel Elkana, in order that he may resume practice. The petitioners include the doctors of Hebron, who were instrumental in saving the lives of the doctor and his family on the day of the massacre. Dr. Elkana expects to resettle in Hebron at once.

Motorist Pays Damages To Railway

For the third time in two months the Central Vermont Railway has collected damages from a careless motorist for damage to its equipment. In this case, the court awarded the railway damages against a man who had left his car on a grade crossing at Roxbury after a fire had blown out. It was hit by a freight train with damage to the locomotive.

Bees carry a load of nectar or honey weighing 90 per cent of their own weight.

High School Correspondence Courses For Saskatchewan

Premier Anderson Implements Pledge To Extend Higher Educational Facilities To Rural Communities

Implementing his pledge to extend high school facilities to boys and girls in rural communities of Saskatchewan, Premier J. T. M. Anderson, as Minister of Education, has announced that, beginning in September, high school correspondence courses in Grades 9, 10 and 11 will be inaugurated by the Department of Education. These courses, while not intended to interfere in any way with existing school arrangements, are being instituted for the benefit of Saskatchewan boys and girls who have not reasonable opportunities of obtaining a high school education in their own districts.

Optional Subjects

The courses will provide full preparation of students for Junior Matriculation and Entrance to Normal Schools. In addition to all compulsory subjects of Grades IX, X and XI, the Department is offering many optional subjects such as Agriculture, Chemistry, Physics, Home Economics, Latin and French.

Pupils eligible for these courses must be residents of Saskatchewan and have Grade VIII or equivalent standing. The course in Grades IX and X are offered to pupils who live outside an organized school district or who cannot attend school owing to some physical disability; to pupils who live within a school district but for some valid reason cannot attend school; to pupils who are in attendance at a one-room rural school, such pupils to work under the supervision of the local teacher who may refer questions to the Director in charge. The Grade XI course is restricted to pupils who live more than four miles from a school where Grade XI is being taught. A nominal fee will be charged for all the courses except those taken under supervision of the local teacher.

This new education activity in Saskatchewan is under charge of the

Premier J. T. M. Anderson, Minister of Education, who announces a policy of High School Courses by Correspondence.

Director of High School Correspondence Instruction, Department of Education, Regina, from whom application forms and terms of enrolment may be obtained.

Advertising Scenic Attraction

Province Of Alberta Issues An Illustrated Booklet

The scenic attractions of the Province of Alberta, including such well known spots as Banff and Lake Louise, are set forth in a little illustrated booklet issued by the Provincial Government. In it an unusual variety of sights are listed, among them being: the Wainwright Buffalo Park, the Turner Valley Oil fields, the region of the dinosaur remains, and the Prince of Wales' ranch. Clear and handy information is given on how to reach these respective places, and where to stay when there. Fishing and hunting regulations and other necessary information is also included.

It's easy to pass and cut in ahead of another car when a third one is coming if both of the other drivers fail to kill a fool.

Antelope, racing an automobile, were shown by the car's speedometer to be going at a maximum speed of slightly over 45 miles an hour.

Liverpool, England, is to have a \$15,000,000 cathedral.

Imperial Army Pensioners

Colossal Sum Spent By Great Britain In Connection With Care Of Veterans

Imperial army pensioners and their dependents in Canada receive each year between five and six million dollars from the home government, according to Sir George Chrysalis, secretary of the British Ministry of Pensions, who is in Ottawa to visit the Canadian headquarters of the ministry.

Some idea of the colossal burden which the motherland is bearing in connection with the post-war care of its veterans can be gauged, stated Sir George, by the fact that the sum of more than \$4,500,000,000 has been spent in war pensions alone since the armistice. This sum exceeds the whole pre-war national debt of Great Britain. The present expenditure is approximately fifty-three million pounds a year or slightly over a million pounds a week.

There were in Canada and the United States about 12,000 war pensioners who were paid from Ottawa, while the total number in receipt of pensions at home and abroad, including dependents, was in excess of 1,250,000.

Ontario Welfare Institutions

Government Invited To Spend Huge Sums On Charitable Work

The province of Ontario is invited to spend between \$20,000,000 and \$25,000,000 in the extension and improvement of its charitable and corrective institutions, by the report which the royal commission on public welfare appointed last October, has submitted to the provincial government.

Steps are urged to secure legislation for the sterilization of criminal or moral defectives, and statistics being quoted to show that much crime is traceable to heredity or mental deficiency. The jails of the province are found "inferior in nearly every sense of the word, crowded and without the desirable age and type of segregation."

The general hospitals, it is submitted, "should be a complete charge upon public funds, either provincial or municipal."

Another "important recommendation" concerns the establishment of a department of public welfare to strengthen government supervision of the social and corrective institutions and agencies. It is suggested the department might include a minister and his deputy and directors of mental hygiene, psychiatry and research work, child welfare, adult reformation, handicapped children, adult corrective institutions, juvenile delinquents; a director of supplies and products and a director of inspection.

Another charge in the present system favored by the commission is the placing of the supervision of hospitals and general physical health under the Department of Public Health, now existing instead of leaving them under control of the provincial secretary's department.

Shakespeare, in 46 volumes of abbreviated braille, is in use for the blind in London's National Library for the Blind.

People of this country spend more on medicine than on doctors' bills, a survey indicates.

Thirty different races, each speaking a different dialect, are found in the Philippine Islands.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN'S SUNROOMS ETC.

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

CHAPTER XXVIII

As those two in the doorway moved out of the mirror's line of reflection, Grandma lifted compassionate eyes to Jimmy Bennett. She could not speak. Her throat felt parched. Anything she might say would seem inadequate; so it was in silence Jim arose and moved dazedly toward the door that led to the room beyond.

"I'll get out the back way," he managed to say huskily. "You tell her that George K. sent for me. Tell her anything you're a mind to except the truth. I'll be all right after a minute. Don't worry. I'll be back."

But he was too late. Charmian was back, her eyes still shining as she glanced in bewilderment from Grandma's troubled countenance to the grim face of her old playmate.

"Where are you going?" she began, puzzled. "Come back, Jim. Sit down. I've got some news for you. What makes you act so queer?" Then light broke in upon her, and she cried: "Oh, look here! Did—did you see that idiot kiss me?"

Her cheeks flamed, but Jim still stood in the doorway. He might have been a statue. He didn't speak; but Grandma answered shakily: "In—in the mirror, dearie. I didn't know you cared that way—either of you. I thought."

"I see," said Charmian. She laughed, and going close to Jim, looked at him: "And you thought, too, Jim? Really, I don't know that I blame you. It must have looked that way. That kiss."

"You don't have to explain a kiss like that, Charmian," Jim broke in gruffly. "It spoke for itself. I wish you happiness, of course; but now."

Uncle George is waiting for me, and the girl drew an exasperated breath.

"Let him wait," she responded. "You shan't go one step, Jim Bennett, till I've made you and Grand-

ma understand this thing. Sit down. That kiss was—well, sort of a vicarious kiss, you understand. It was a kiss by proxy, so to speak. I want me John Carter was really kissing but a girl who's crossing the ocean now, to come to him—a girl he's adored for ages, though he was too proud to say so—nothing to offer her and—Oh, you know that foolish line of thought."

"It's a long story, too long to go into now; but anyhow, he wrote to her after the old doctor died and he thought he'd be able to get married. His letter came back unclaimed. Then he found from a friend that she had gone abroad. He wrote in care of the American Express, and that letter came back, too. Then he tried Paris, and after following her all round Europe, the letter reached her in London, and she cable-d. It was that message he brought for me to see. She sailed at once. Told him to meet her at the dock with a marriage license! Do you wonder the poor boy was a little off his head? He's been half crazy with anxiety, and—well," said Charmian, a smile curving her lips, "he just naturally had to kiss some one, didn't he?—and I was handy."

"Trudly!" echoed—Jim, Bennett, staring. "Are you trying to tell me that if he'd run into Lizzie Baker he'd have kissed her?"

This bit of humor was an heroic effort on Jim's part to clear the atmosphere. In reality, it was difficult for him to speak. But his words were rewarded by a smile from Grandma, and a dimple from Charmian as she endeavored to reply sedately: "I'm not sure that he wouldn't have, though you know, Jim, I've been a—sister to him."

"I shouldn't hardly have thought it from the looks of things," said Grandma with unintentional humor. "At one time I was pretty sure we were going to keep him in the family. How long have you known about this girl, dearie? Why didn't you tell me?"

"I'd known you were thinking what all the Wickfield busybodies were thinking," replied Charmian, "I would have told; but it was a confidence, and I saw no reason to violate it. John is terribly close-mouthed about his own affairs, and he didn't know that the girl loved him. I think it was an immense relief to him to talk to me, though it's my private opinion that he'd never have done so if he hadn't suspected what Wickfield was saying about—us."

"Did he think you were maybe getting to love him?" asked Grandma inquired her.

Charmian flushed. "He's not so conceited as all that; but he was quite right to let me know that his heart's in the highlands," he told me ages ago. In fact, he tried to tell me the day that Moore child ruptured her appendix, but we were interrupted, and a week or so went by before he had another chance. I suppose all Wickfield thinks that he broke my heart. Sometimes I wonder why he didn't. He's tremendously easy to love."

"You're sure that useful organ is intact?" Jim questioned. "Intact, but battered," confessed Charmian. "Jim, where are you staying? You can put up here as well as not."

"I'm at Uncle George's—left the train at Esbarto and came over by automobile, just for the fun of surprising everybody. Aunt Salina nearly passed out when I walked in at dinner time. I told her I wouldn't be back till after supper—thought if I hinted hard enough I might worm an invitation out of somebody."

"Are you sure that useful organ is intact?" Jim questioned. "Intact, but battered," confessed Charmian. "Jim, where are you staying? You can put up here as well as not."

"You're welcome to invite yourself any time you want to. I've missed you like anything, Jimmy, and I presume Charmian has, too, though maybe she's too bashful to let you think so."

"She means 'maidenly,' Jim," laughed Charmian, "and I fear I'm not even that. I've missed you abominably, and don't mind saying so to you. But if you're to stay to

BENEFIT WRIGLEY'S

No other sweet lasts so long, costs so little or does so much for you. Promotes good health when used regularly after every meal. It cleanses teeth and throat, sweetens mouth and breath, and strengthens the gums. Your health is aided while your pleasure is served.

Good and Good for You

AFTER EVERY MEAL

super you'll have to help to get it; and anyway, Grandma has talked enough for one while. You close your eyes, Grandma, and get a cat-nap while we're here."

The young man arose with alacrity, and Grandma said: "You get something good and hearty, Charmian. Jim's hungry after his long journey. Maybe he'd relish one of your nice omelets with bacon. And you'd better re-visit some biscuits while you're about it."

"You're nothing if not hospitable, Grandma," smiled the guest, "but I refuse to be treated as company."

He stooped to take the old lady's hand in a gentle grip that said, "All right, I'll wait till you've followed Charmian to the kitchen."

"This looks like an ark," he commented, glancing about appraisingly. "I suppose I've become accustomed to kitchenettes; and in these days when most of us don't keep a lot of help, I'll admit that they save steps. Come here to the window, Charmian. I want to look at you."

She smiled and answered: "Are you trying to detect gray hairs? It's a wonder I haven't got some, Jimmy. Her, face clouded suddenly. "Did Uncle George tell you about

"About what?" he prodded as she hesitated.

Charmian shivered. It had swept over her achingly that tomorrow she would be getting supper in a kitchen belonging to some stranger. She tried to stave off the vision, but the unshed tears behind her lashes.

"I've had to part with the old house, Jim. It was more than I could swing alone. I signed the papers tomorrow morning at the bank. Don't tell Grandma tonight. She knows it's coming, but not when. It's silly to care so much for a house, isn't it? And yet—"

She turned abruptly away, did something unnecessary to the stove, and came back with a smile on her lips that twisted Jimmy's heart.

"I'm sorry, Charmian," he began, "but it's the—"

"Now don't you tell me it's sensible!" she cried, a sob in her voice. "Everybody tells me that—even Grandma. I know it's sensible, but—"

"I wasn't going to call it sensible," said Jim patiently. "I'm not even sure it is, when it hurts you so. I was going to say that it's the way life usually treats us—lets us see our hearts on something, and then, when it seems as if we couldn't live without it, it takes it away. What's buying the old place for?"

"I don't know even that—some stranger who took a fancy to the house and asked at the bank if it could be bought. Uncle George arranged it. And we'll still have the law office, Jim. We'll live there and—"

She explained their plans, while Jim, staring out of the window toward the orchard, listened thoughtfully.

"It was the dear old doctor's scheme," said Charmian, "and once we get used to the change it will be all right. Now let's cheer up. It's hateful of me to thrust my burdens on you as soon as you arrive; and we must give Grandma a good time. She hasn't looked so happy for days and days, Jim. Forget my troubles now, and pare these apples. I'm going to make Dutch apple cake instead of salsic because you like it. Wait till I find this apron round you, please. That's a dandy suit, and you mustn't get it spotted the first thing."

Jim's familiar smile came back as he tied him into the blue apron. He said: "I'm glad the suit has made a hit. Mother thought I'd taken leave of my senses when she came across the bill in a coat pocket. I told her that considering the wealth she was squandering on a fruit, ranch, she couldn't consistently complain of my extravagance. Then Aunt Sophie came in and told me my side. Aunt Sophie's a peach. She's like my mother."

W. N. U. 1833

er—well, with all the angles and—paped. Do you catch my meaning? You'd love her, anyway. It was worth being exiled all this time to find an aunt like that, believe me."

"Was that all you found in California?" queried Charmian as she measured flour into a blue bowl. She was remembering the "girl" mentioned in Lizzie Baker's letter, but Jim answered in seriousness: (To Be Continued.)

Body Of Andree Is Found

Remains Of Famous Swedish Explorer Discovered After 33 Years

Out of the Arctic silence has come the grim last chapter of aviation's first North Pole arguay, solving after 33 years the mystery of how Salomon August Andree, Swedish balloon-explorer, who set out in an airship, in 1897, for the top of the world, perished with his two companions.

A Norwegian scientific expedition, headed by Dr. S. H. Madsen, sent word to Oslo that its members had found the bodies of Andree and his mates in a camp of their making, on White Island, which lies east of the Spitzbergen group.

No trace of Andree's balloon had been found.

Andree's diary, his scientific instruments, a few scattered objects which evidently had been muzzled by bears but left untouched, and the bodies of the explorers told the gruesome tale of a battle with the elements in which the tall, blonde explorer had survived his fellows.

Andree was accompanied on his trip by K. Frankel and N. Strindberg, the latter, then a handsome youth of 24, professor in a Swedish university, engaged to be married but putting off his wedding until he might return from this one last adventurous fling before settling down. Despatches reaching Oslo did not readily identify the man whose body was found near that of Andree, and described as well preserved.

Andree made his great Polar attempt from the frozen wastes of Spitzbergen, July 11, 1897. In the previous year he had failed. He had launched the idea in 1895, thirty-one years before the epochal voyage of Agassiz and the "Norge" across the Pole, accomplished Andree's ideal.

Upon a desolate, treeless island, at the base of a high cliff some 500 feet inland, the Norse explorers came upon the camp of death on August 6. Today a Norwegian sealer, according to advices from the Horn party, was bringing the bodies and other effects of the explorers to Norway.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in complexion delightfully young and lovely. Indispensable to all delicate skins, it is a beautifying lotion, it is unrivaled for its effect on the skin. Recommended also to soften and make the hands flawlessly white.

Fast British Trains

Cheltenham Flyer Attains Speed Of 80 Miles An Hour

When I travel from Brighton to London at night, I see nearly always at Victoria Station a few young passengers admiring the huge and handsome engine of the King Arthur class, which has drawn its train. Big engines and famous trains still have an invincible attraction for youth—as you may learn at almost any station. British trains, as shown by the summer timetables, are the fastest in the world. The fastest of all is the "Cheltenham Flyer," which is timed to do the 77 miles from Swindon to London at 66 miles an hour, but actually covers the distance on many days at a speed of 80 miles an hour.

Nearly a century ago, Brunel, in this matter of speed was far ahead of his time. He thought 60 miles a rate to aim at, though there were quite a number of his contemporaries who seriously favored the imposition of a speed limit of 15 to 20 miles, for "the safety of passengers."—London Daily Mail.

It Has Many Qualities. The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent aches and will speedily heal cuts and contusions. It is a medicine chest in itself.

The dandelion's name comes from French words meaning lion's tooth, bestowed on the plant because of its tooth-edged leaves.

Diatempore responds quickly to Douglas Egyptian Liniment. Keep a bottle handy in the stable.

"Some people have no initiative," says a writer, "they merely follow the lead of those with brains." Led by the knows.

Minaid's Liniment is a household friend.

ENO'S "FRUIT SALT"

The Safest, Surest Way To Health

The daily dash of ENO in a glass of water every morning is the safest, surest way to inner cleanliness. And to be inwardly clean is to be healthy.

ENO'S "Fruit Salt" is a delicious health beverage that tones and sweetens the entire system. For constipation, acid stomach, fatigue and biliousness it is without equal.

But remember, only ENO can give ENO results.

Wingless Aircraft

Successful Flight Of Latest Addition To Aircraft Is Reported

The New York Times says a wingless aircraft based on the principles of the celebrated Flettner rotor ship, has been built and successfully flown on Long Island Sound, off Mamaroneck, with the backing of New York capitalists.

The aircraft is described as similar in appearance to a seaplane without wings. A single motor in the nose supplies the traction through a three-bladed steel propeller. An auxiliary air-cooled gyp motor supplies power to rotate the cylinders which take the place of wings.

Three rotors are in four sections, two on each side of the centre longitudinal line of the craft. Forward is an out-rigger rudder and behind is a small pair of tandem cockpits. Between the motor and the cockpits two long booms are used in place of the usual four longerons.

Use Minaid's Liniment for Foot Ailments.

Wool Warehouse Destroyed

Half a Million Dollar Loss Occasioned By Fire At Weston

Damage estimated at \$500,000 was caused by a fire which destroyed the building of the Canadian Co-operative Wool Growers' near Weston, Ont. Charred and crumpled, the building contained 3,000,000 pounds of water-soaked wool were all that remained of the structure after firemen had finally conquered the blaze. Officials were at a loss to determine the cause of the fire.

Most of the bugle calls used in the United States Army have been adopted from other countries.

Little Helps For This Week

"I will teach you the good and the right way."—1 Samuel xii. 23.

Live to do good; but not with thought to win. From man return of any kindness done.

Do naught but good; for such the noble strife. Of virtue is, 'gainst wrong to venture love.

And for thy foes devote a brother's life. Content to wait the recompense above.

Brave for the truth, to fierce in suits meek. In mercy strong, in vengeance only weak.

—G. W. Bethune.

He began to talk very gently about different sorts of kindness, and that if I wished to be kind like a Christian, I must be kind without hoping for any reward, whether gratitude or anything else. He told me that the best followers of Jesus in all time had tried to do everything, however small, for God's sake, and to put themselves away.

—Juliana Horatia Ewing.

Some people are so blinded with tears from weeping over opportunities that have passed they cannot see those that are coming.

About one-fifth of the highway mileage in the United States is surfaced.

The NEW IVORY

GYPROC
Fireproof Wallboard

When Pain Comes

What many people call indigestion very often means excess acid in the stomach. The stomach nerves have been over-stimulated, and food acids. The corrective is an alkali, which neutralizes acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia. It has remained the standard with physicians in the 50 years since its invention.

One spoonful of this harmless, tasteless alkali in water will neutralize instantly many times as much acid, and the symptoms disappear at once. You will never use crude methods when you learn the efficiency of this. Go get a small bottle to try. Be guided by the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drug-store.

WEEKLY REVIEW PROV. MARKETS

Markets as Revised by the Market
Examiner, of Calgary,
For This Paper.

Cattle

BEEF—Buyers are keener and trading fairly active. Choice heavy steers \$5.50@5.75; choice light from \$5.75@6.00; good \$5.50@5.75; medium \$4.50@5.00, and common from \$3.00@4.25. Choice heifers brought \$5.75@6.00, and good kinds \$5.25@5.50.

FEEDERS-STOCKERS—Trading in this market has been quite active. The demand has been good and salesmen have cleaned up offerings readily. Feeder steers made from \$4.00@5.00; stock steers \$3.50@4.50; stock cows from \$2.50@4.00.

HOGS

Market at Edmonton also higher, bacon being quoted at \$9.85; select \$10.35, and butchers \$9.50, on a fed and watered basis.

SHEEP

Lambs again showed weaker undertone on the Edmonton market. Yearlings sold at \$4.00@4.50; ewes \$2.00@4.00, and lambs \$5.50@6.00.

BUTTERFAT — BUTTER — MILK BUTTERFAT—Slight decrease in receipts noticeable, but only seasonal decline. Prices holding steady. At Special, 25¢@27¢; first, 23¢@25¢; second, 20¢@22¢, at country points and centralizers.

BUTTER—Make holding up well with market firmer. No. 1 cartons 33¢; No. 2 cartons, 31¢; No. 1 prints, 32¢ and No. 2, 30¢.

DAIRY BUTTER—Demand good for fancy table; other grades slower. Fancy table bringing 24¢; No. 1 17¢@19¢ and No. 2, 13¢.

MILK—Receipts easing up, but still large surplus. Price steady at \$2.30 per 100 lbs., basis 3.6.

POULTRY — EGGS

POULTRY—Offerings fairly liberal and bulk of supplies are chicken, although quite a few fowl also arriving. Demand reported as fair, but purely local. Prices steady. No. 1 fowl, ever four lbs., 10¢; under four lbs., 8¢; roosters, 1¢, and broilers, 12¢.

EGGS—Market moved higher this week by 1¢. Extras, 22¢; firsts, 21¢ and seconds 17¢. Supplies in most cases have eased 1¢. Large percentage of hot weather stocks coming. Demand moderately active.

HAY — OATS

HAY—Harvesting operations holding back deliveries. Demand only limited. Crop of very good quality; prices steady. Upland bringing \$12, and timothy \$17 per ton at country points. Upland quoted at 14 per ton on loose hay market.

FEED OATS—Market easier, with quotation of 35¢@36¢ prevailing. Receipts light, but are sufficient for demand. Believe stocks in country

are fairly heavy.

HIDES — WOOL

HIDES—Undertone of market weak and flint dry offerings cut 1¢. Other skins unchanged. Country hides very hard to move. Packers selling freely, but tanners not absorbing all they offer. Quality of receipts good.

WOOL—No improvements in market outlook. Receipts light. Price steady at 7@8c per lb.

THE ROYAL RULES

It would seem at first glance that there is not a great deal in common between a King and a commoner. On hearing through the columns of The Churchman, of the personal code of Our Sovereign King George V. one rejoices to find that they are the strong, kindly sentiments which may be shared by even the humblest of his subjects.

History will relate to future generations that the reason the King was enthroned in the hearts of the people of his great Empire was simply that he lived honestly according to his creed and code.

These six sensible rules of living crystallize the best teachings of the wise of all ages. They are not easy to live up to, although simple in their essence. They are rules for the young, as well as for the adult; and one feels that as an ideal for children going to school they cannot be surpassed.

Like the aims and objects of the Junior Red Cross, which numbers its twelve million members in every quarter of the globe, the Royal Rules make for the best citizen ship and the finest expression of service.

Let every student copy the following and use their best to live up to His Sovereign's code:

1. Teach me to be obedient to the rules of the game.
2. Teach me to distinguish between sentiment and sentimentality, admiring the one and despising the other.
3. Teach me neither to proffer nor to receive cheap praise.
4. If I am called upon to suffer, let me be like a well-bred beast that goes away to suffer in silence.
5. Teach me to win, if I may; if I may not, teach me to be a good loser.
6. Teach me neither to cry for the moon nor to cry over spilt milk.

"I will have to be getting new furs this season," remarked a local lady to her husband last week. "Why, you just got those fox furs a year ago," he exclaimed. "Yes, I know," she replied, "but you must remember that the fox wore them a few years before I got them," she replied.

"What must we do first before we can expect forgiveness for our sins?" asked a Sunday school teacher here of a little girl. "We must sin first," the little girl replied.

HEALTH SERVICE OF THE CANADIAN MEDICAL ASS'N

The small cut or scratch is not dangerous in itself, but it very often leads to a serious condition. The reason for this can be explained in a short phrase—neglect leads to infection.

The normal skin is a barrier which keeps out infection. When the barrier is broken, this affords an opportunity for the admission of germs which cause infection and to start the serious troubles for which these germs can be responsible.

The germs which cause infection are everywhere. By infection, we mean the inflammation, pain and swelling that generally progress to the formation of pus.

Years ago, very few operations were performed. This was not because when they operated, the wounds became infected.

It was Lord Lister who made modern surgery possible by devising a practical means of keeping the germs out of wounds, and thus removing the risk of infection from operations.

Wound infections do not occur in hospitals today because of the methods used to keep germs out of wounds. Before a doctor cuts the skin, he prepares the surface in such a way as to destroy any germs present; he wears sterilized gloves for the operation, and uses only such instruments and accessories as have been sterilized.

To prevent trouble, the simplest cut or scratch should be promptly and properly treated. In this way, we can prevent the needless suffering and untimely deaths that often occur because of the neglect of something which appears too trivial to bother about.

There are certain rules we should follow, and one of these is never to put our fingers on a wound. Some persons always want to stick their fingers into everything, and by so doing, they are apt to cause considerable amount of trouble. The hands, unless very thoroughly scrubbed, are almost sure to carry infection, and therefore, they should be kept away from cuts.

The treatment of wounds which are at all serious should be left to the doctor. When the skin is broken, it should be thoroughly cleansed, and for this, we should rely chiefly upon a scrubbing with soap and water. The surface should then be covered with a sterile dressing which is changed when soiled.

Swelling or pain is the first symptoms of infection, and if these occur, there should be no delay in calling the doctor.

Neglect leads to infection; prompt care prevents it!

Questions concerning Health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Barber—"Haven't I shaved you before?"
New Customer—"No, I got these scars in France."

Main Street

The Irma public school opened on Tuesday, September 2nd.

Miss Hazel Condon is substituting for Mrs. McDowell in the senior room of the Irma public school.

Miss Jessie Douglas who taught at Sunny Brae two years ago was an Irma visitor for the week end.

The Ladies Aid will meet at the home of Mrs. Tripp on Thursday, September 11th. Everybody welcome.

Mr. Ralph Dunlop and brother Ernest were visitors at the Penton home over the week-end.

The Ladies Aid of Irma are holding an afternoon tea and sale of home cooking on Saturday, September 6th from 4 to 6 P.M. upstairs in the Nu-Way Store.

Miss Lillian Whitby who has been the guest of Rona Penton for the past month returned to Edmonton by motor on Monday.

Mrs. S. G. Simmons received word on Tuesday of the death of her mother at her home in Edmonton. Mrs. Hall has been an invalid for over a year.

Mr. and Mrs. Harold Cockroft and family are visiting at Mrs. Cockroft's parents, Mr. and Mrs. W. Cole also her sister, Mrs. Girdfield Courtman.

Mrs. T. H. Elford and little daughter Gloria motored from Vancouver with friends and are visiting Mrs. Elford's parents, Mr. and Mrs. Moore and friends of Irma.

Friday afternoon Mr. J. Fleming of the Zaldovara district, brought a four horse outfit to town to take out a new binder. While hitching the horses one of them kicked him in the chest breaking two ribs and injuring one of his arms which will probably lay him up for the balance of the harvest season.

Mr. and Mrs. Reeds returned Friday night after spending their vacation with relatives and friends in Ontario.

Miss B. Wilson spent the week-end with her parents at Edmonton.

Sunday afternoon while Martin and Joe Smith who are working for Mr. B. Oldham were driving to town in their car something happened to the steering gear while crossing a fill in the road near Burton's farm. The car landed in the ditch bottom side up and Martin had a fracture in the right shoulder which was attended to by Dr. McPherson.

Mr. and Mrs. George Smith of Toronto, have been visiting with Mr. and Mrs. Ross McFarland at Irma. Mrs. Smith is a cousin of Mr. McFarland.

Last week end Roy Whyte was called to Calgary on account of the serious illness of his father.

Mr. Archie Skiles and a friend from Edmonton have been visiting his father Mr. J. T. Skiles at Irma.

Mrs. F. Higgins motored to Edmonton Friday when she took her son Eric Richardson back to duty at the Royal Alexandra hospital after spending his vacation at Irma. Mrs. McGregor accompanied them to Edmonton.

Mr. and Mrs. W. Hedley and daughter, the Misses Bessie and Victoria, and Miss Clara King, of Edmonton spent the week-end with Mr. and Mrs. W. H. King at Irma.

Mr. and Mrs. C. T. Hill have rented Mrs. McGregor's house and intend moving in town for the winter after they have finished harvest.

Fairy Story

Bill Smith had faulty brakes . . . he knew it too! They were always going to be relined "tomorrow" . . . but one day a street car couldn't dodge him . . . Bill is still on the crutches.

Bad brakes have caused more motor accidents than any other one thing.

If you value your safety — your car and the safety of others, you will not neglect your brakes.

Have them relined with **Genuine Raybestos Brake Lining**, and then you are confident of quick, sure stops in traffic, on the hills or the open road.
